

17/10/2017

Bristol Rovers are looking to appoint a Club Doctor, to commence in December 2017.

The Role includes matchday cover for all First Team home games at the Memorial Stadium, Bristol, and to offer medical support and advice as required in liaison with the Club's Medical and Coaching staff. New player medical screening will also fall under this remit.

The Club Doctor will support the Academy by providing consultations to Academy players upon referral from the Head of Academy Medicine as required, and also that they would be responsible for supporting the medical screening process for u18 players entering the full time training model. But there will be no requirement to cover Academy matches at this time.

Experience working in elite/professional sport in some capacity is desirable but not essential.

FA Regulations require Team Doctors to have:

- Licence to practice by the GMC
- Hold a Diploma in Sports Medicine or equivalent higher professional qualification
- Continue a programme of CPD as determined from time to time by the profession
- Hold a valid FA Advanced Resuscitation and Emergency Aid (AREA) Certificate, or equivalent (see below)
 - Advanced Trauma Medical Management in Football (ATTMiF)
 - Intermediate Medical Management on the Field of Play (IMMOFP)
 - Medical Cardiac & Pitch Side Skills (SCRUMCAPS)
 - Emergency Medical Management in Individual Team Sports (EMMiTS)
 - Standard Principals of Resuscitation & Trauma in Sports (SPORTS)

NB The successful candidate is not required to have the AREA Certificate on application for this post, but would need to successfully complete the course before commencing matchday duties at the end of December.

For expressions of interest please contact:

Keith Graham, Head of Medical Services
